PROFESSIONAL SUMMARY

Final-year B.Tech Information Technology student aspiring to build a career in Information Security, GRC and Technology Risk. Hands-on project experience creating an information security risk register, access control policy, security evidence documentation and network and system security documentation. Familiar with risk assessment, internal controls, ISO/IEC 27001 fundamentals, audit evidence and Windows and Linux security.

EDUCATION

- **K.J. Somaiya Institute of Technology** 2023–2027 (Expected)
B.Tech. Information Technology CGPA: 8.14
- **Maharashtra State Board** 2023
Higher Secondary Certificate 75.33%
- **Maharashtra State Board** 2021
Secondary School Certificate 81.40%

EXPERIENCE

- **SkillCraft Technology** Feb 2026 – Mar 2026
Cyber Security Intern Virtual
 - Applied cybersecurity concepts covering threat analysis, security fundamentals, and security best practices. Strengthened research, analysis, and documentation skills relevant to Information Security and GRC. Received a Letter of Recommendation from Tech Lead Pranav Bansal.

CYBERSECURITY & GRC SKILLS

- **GRC & Risk:** Governance, Risk Management, Compliance, Risk Identification, Risk Assessment, Risk Matrix, Risk Scoring, Inherent Risk, Residual Risk, Risk Treatment
- **Controls & Documentation:** Security Policies, Access Control, Evidence Documentation, Administrative, Technical, Physical, Preventive, Detective, Corrective and Compensating Controls
- **Security Fundamentals:** ISO/IEC 27001 Fundamentals, ISMS Fundamentals, CIA Triad, Authentication, Authorization, Least Privilege, Data Classification, Network and Operating System Security
- **Tools:** Microsoft Word, Microsoft Excel, GitHub, VS Code, Windows Defender, Windows Firewall, Event Viewer, Linux/Ubuntu

GRC & INFORMATION SECURITY PROJECTS

- **ISO/IEC 27001 Mini ISMS Documentation Pack** 2026
GRC / ISMS Documentation
 - Created a five-document ISMS pack comprising an ISMS Scope Statement, Information Security Policy, Security Objectives, Risk Treatment Plan, and sample Statement of Applicability.
 - Applied ISO/IEC 27001 fundamentals, document control, risk treatment, control applicability, and audit-ready documentation practices.
- **ABC Solutions – Information Security Risk Register** 2026
GRC / Risk Management
 - Created a complete Information Security Risk Register for a fictional organization covering assets, threats, vulnerabilities, risk statements, likelihood, impact, risk scores, owners, treatment strategies, target dates, and status.
 - Applied likelihood-and-impact scoring, documented inherent and residual risk and treatment decisions, and used structured risk criteria, version control, and consistent terminology.
- **Password & Access Control Policy** 2026
GRC / Information Security Documentation
 - Created a structured security policy covering password requirements, account access, authentication, authorization, user responsibilities, and access management.
 - Applied security principles including least privilege, strong authentication, secure password practices, and access control.
- **Windows Security Configuration & Evidence Documentation** 2026
System Security / Security Documentation
 - Documented Windows security configurations and security-related settings using structured evidence and screenshots.
 - Reviewed security controls including Windows Defender, Windows Firewall, user accounts, system settings, and security-related configurations.
- **Linux Commands & System Administration Handbook** 2026
Linux / System Administration Documentation
 - Created a structured handbook covering Linux commands, file systems, users and groups, permissions, processes, services, logs, and system administration fundamentals.
 - Documented security-relevant concepts including sudo, chmod, chown, user permissions, processes, and Linux logs.
- **Network Basics & Security Documentation** 2026
Networking / Information Security Documentation
 - Created structured documentation covering networking fundamentals including OSI, TCP/IP, IP addressing, DNS, HTTP/HTTPS, VPN, firewalls, routers, switches, and ports.
 - Connected networking concepts with basic security considerations and common network security controls.
- **Basic Office Network Documentation** 2026
Network Documentation / Security
 - Documented a basic office network structure including network components, connectivity, and communication flow.
 - Included basic security considerations for protecting office network infrastructure and connected systems.

- **Information Security & GRC Learning Program**

2026 – Present

- Self-Directed Learning*

- Studying cybersecurity fundamentals, networking, operating systems, information security controls, GRC concepts, security documentation, and ISO/IEC 27001 fundamentals.
 - Practicing the creation of security policies, procedures, control documentation, and risk-related documentation.

CERTIFICATIONS

- **HarvardX** – CS50: Introduction to Cybersecurity
- **Simplilearn** – Introduction to Cyber Security
- **Forage** – Cybersecurity Job Simulations: Mastercard, Telstra, Tata, Deloitte Australia
- **TCS iON** – Career Edge: Young Professional
- **HarvardX** – CS50P: Introduction to Programming with Python
- **IIT Bombay** – Python Training
