Purpose

The purpose of this document is to define the scope and boundaries of the Information Security Management System (ISMS) established by ABC Solutions. The scope identifies the business processes, information assets, technology, personnel, locations, and supporting services covered by the ISMS.

This scope supports the implementation and maintenance of the ISMS in accordance with ISO/IEC 27001:2022 and provides a clear basis for information security risk management and the application of appropriate security controls.

ISMS Scope

The Information Security Management System (ISMS) of ABC Solutions covers the people, processes, information assets, technology, and supporting services involved in the delivery and management of the organisation's IT and cloud-based business services.

The ISMS applies to operations conducted from the Mumbai office and the cloud infrastructure used to store, process, and transmit organisational and customer information. It includes employees, authorised third parties, business applications, endpoints, network infrastructure, cloud services, and information supporting these operations.

Scope Boundaries

The boundaries of the ISMS are defined as follows:

Boundary	Included in ISMS
Physical Location	ABC Solutions Mumbai office
Personnel	Employees and authorised third parties supporting in-scope operations
Information	Organisational and customer information processed within the scope
Technology	Endpoints, business applications, network infrastructure, and cloud services
Business Processes	IT operations, access management, information security, and supporting business processes
Cloud Environment	Cloud infrastructure used to store, process, or transmit in-scope information

Scope Exclusions

The following activities and assets are outside the defined scope of the ISMS:

- Personal devices that are not authorised for business use.
- Business activities that do not process, store, or transmit information related to the in-scope services.
- Third-party infrastructure that is not used to support or deliver the in-scope services.

These exclusions do not affect ABC Solutions' ability or responsibility to provide secure in-scope services or meet applicable information security requirements.

Interfaces and Dependencies

ABC Solutions relies on internal and external services that interact with and support the in-scope ISMS. These interfaces and dependencies are considered when managing information security risks and implementing appropriate controls.

Interface / Dependency	Description
Cloud Service Providers	Provide infrastructure and services used to host, process, and store in-scope information.
Internet Service Provider	Provides network connectivity supporting business operations.
Third-Party Vendors	Provide products or services that may support in-scope business processes.
Employees and Contractors	Access and use organisational information and systems while performing authorised business activities.
Customers	Provide or receive information through the organisation's in-scope services.

Interested Parties and Requirements

ABC Solutions identifies relevant interested parties whose requirements may influence the Information Security Management System. These requirements are considered when defining and maintaining the ISMS scope.

Interested Party	Relevant Information Security Requirements
Customers	Protection of customer information, confidentiality, availability of services, and compliance with contractual requirements.
Employees	Secure access to systems, clear security responsibilities, and appropriate security awareness.
Management	Effective risk management, protection of business information, and achievement of information security objectives.
Regulatory and Legal Authorities	Compliance with applicable legal, regulatory, and information security requirements.
Third-Party Vendors	Compliance with agreed security requirements and protection of information shared with ABC Solutions.
Cloud Service Providers	Appropriate protection and availability of cloud services supporting in-scope operations.

Scope Approval

This ISMS Scope Statement has been reviewed and approved by the management of ABC Solutions. The scope shall be reviewed periodically and when significant changes occur to the organisation, its business processes, technology, locations, interested parties, or information security requirements.
